DETAILED ACTION

Status of Claims

- 1. Applicant's amendment filed 12/15/03 is acknowledged and entered. Claims 89, 114, 135, and 149 have been amended.
- 2. Claims 1-88 have been canceled by the amendment filed on 11/8/02.
- 3. Claims 89-156 are pending.

Withdrawn Objections and /or Rejections

- 4. Applicant's arguments, see page 13, filed 12/15/03, and amendment of claims 89, 114, 135, and 149 with respect to the previous rejection under 35 USC 112, first paragraph (new matter) has been fully considered and are persuasive. The rejection under 35 USC 112, first paragraph (new matter) of claims 89-153 has been withdrawn.
- 5. Applicant's arguments, see page 14, filed 12/15/03, and amendment of claim 149 with respect to the previous rejections under 35 USC 112, second paragraph, have been fully considered and are persuasive. The rejections under 35 USC 112, second paragraph, of claim 149 have been withdrawn.
- 6. Applicant's arguments, see pages 14-15, filed 12/15/03, with respect to the rejection of claims 89-156 under 35 USC 103(a) as being unpatentable over Stylli et al. (US Patent

Application/Control Number: 09/611,835

Art Unit: 1639

5,985,214) and Reddy (US Patent 6,017,908) have been fully considered but are moot in view of the new ground of rejection.

New Rejection

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 9. Claims 89-148 and 154-156 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stylli et al. (US Patent 5,985,214).

Stylli et al. teaches an automated method and system for identifying chemicals having useful activity such as biological activities of chemicals and collecting informations resulting from such a process (col. 6, lines 1-24). The method comprise of testing a therapeutic chemical

Application/Control Number: 09/611,835

Art Unit: 1639

رميلا

for modulating activity of a target such as cell surface proteins in a cell based assay (col. 38, lines 46-67; col. 39, lines 1-9; col. 43, lines 6-9). The method comprises dispensing the reagents (compounds) into the addressable sample wells, which contains a predetermined volume of the sample (test cells) (col. 6, lines 25-40; col. 8, lines 14-18). The method can individually screen at least 25,000 selected and discrete chemicals or chemical libraries wherein the chemicals are structurally related base on activity relationships (i.e. a combination of compounds) (col. 37, lines 44-51). Various method of detection of the compound interaction with the target includes fluorescent measurement such as FRET (fluorescence resonance energy transfer) (col. 27, lines 29-35; col. 28, lines 15-17; col. 39, lines 1-67 thru col. 42, lines 1-23).

The method of Stylli et al. does not expressly disclose that the chemical compounds tested are forty-nine unique combinations of seven different compounds.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to include testing of forty-nine unique combinations of seven different compounds in the method of Stylli et al. One of ordinary skill in the art would have been motivated to include testing of forty-nine unique combinations of seven different compounds in the method of Stylli et al. because the number of combinations of compounds to be tested for the affect of biological property would be a choice of experimental design and is considered within the purview of the cited prior art. Additionally, it has been held that "[w]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA1955). Furthermore, one of ordinary skill in the art would have had a reasonable expectation of success in testing of forty-nine unique combinations of seven different compounds

Application/Control Number: 09/611,835

Art Unit: 1639

in the method of Stylli et al. since the taught method would need no modification other than increasing the amount of compound combinations that do not materially affect the method steps.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to My-Chau T. Tran whose telephone number is 571-272-0810.

The examiner can normally be reached on Mon.: 8:00 -2:30; Tues.-Thurs.: 7:30-5:00; Fri.: 8:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew J. Wang can be reached on 571-272-0811. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
